

NORTHERN ENVIRONMENTAL  
EDUCATION DEVELOPMENT

# Atlantic Edge Geo-Tour of the Landscape and Culture of the Burren, western Ireland

## A week long conference of workshops, tours & cultural exchange in the Burren

Over 50 delegates from Norway, Finland, Iceland and Ireland were introduced to the active and growing geo-education and eco-tourism initiatives in the Burren – and how these initiatives support the aspirant European Geopark project in the region.

Workshops focused on the four national partners exchanging experiences in developing and promoting educational tourism in peripheral regions of north-western Europe.

Daily tours introduced partners to geo-education modules and resources developed in the NEED project for the network of Burren geo-education & ecotourism centres and businesses.

The conference saw the official launch of the NEED project website at the Cliffs of Moher Visitor Experience:
